
POSITION: CIVIL ENGINEER

SKILLS: General civil/site design of water resource and energy sector projects

EXPERIENCE: 7+ years preferred

LOCATION: Henniker, NH

Reward yourself—work for a company that appreciates you.

Do you enjoy challenging work and project variety?

Are you interested in applying your talents to design innovative solutions for the water resource and energy sectors?

If so, Gomez and Sullivan Engineers would like to hear from you. We have a growing regional practice in the northeast and mid-Atlantic states and a national reputation for excellence in civil engineering design relative to the water resource and energy sectors. We are seeking a motivated individual committed to continuing this tradition. Our company has an immediate opening for a **Civil Engineer** in our **Henniker, NH** location. A classic quaint New England town in the heart of south-central New Hampshire, Henniker offers reasonable costs of living, a variety of restaurants and shops, and excellent schools, as well as great recreational opportunities nearby in the White Mountains or at the seacoast.

Our New York and New Hampshire offices comprise a multi-disciplined team of engineers, scientists, technicians, and support staff that promotes close coordination and team building. The company is employee-focused and encourages an atmosphere of continued learning, exposure to a wide variety of project responsibilities, and frequent interaction with the firm's principals.

Our engineering services center on the design of dams, hydroelectric developments, stream restoration projects, habitat improvements, fish passage structures, and recreational facilities. Our staff have considerable civil/site engineering experience to support these projects, including site design (e.g., grading, utilities, roadways/parking, stormwater management, water handling, erosion and sediment control), construction sequencing, permitting, and bidding and construction phase services. We are seeking a committed, detail-oriented individual who will be able to utilize their knowledge, experience, and current software technologies for our clients' immediate and future projects.

RESPONSIBILITIES

- Development and review (QA/QC) of feasibility studies, design plans and specifications, quantity take-offs, engineering cost estimates, construction sequencing plans, and permit applications
- Assistance with bidding and construction phase services
- Preparation of supporting design reports to document engineering calculations and design, leading of design teams, and coordination with affected disciplines
- Leading of technical discussions with regulators and clients as well as public meetings
- Technical writing for project documents, as well as review of junior engineers' technical writing
- Technical guidance and mentoring for junior engineers in their project work and development
- Marketing of professional services, proposal writing, cost estimating, and project scheduling

QUALIFICATIONS

- BS in civil engineering (MS preferred)
- Registered as a Professional Engineer and committed to maintaining registrations in multiple northeast and mid-Atlantic states to support our regional business practice
- Excellent verbal and written communication skills
- 7+ years of experience preferred in the following areas:
 - Evaluation and design of civil projects
 - Specification writing, cost estimating, permitting, bidding and construction phase services
 - Experience with design of recreational facilities, habitat improvements, roads, earthworks, dredging, storm drainage, flood control projects, experience with hydrology/hydraulics, fish passage, civil structures, geotechnical analysis/design, and/or stream restoration desired
- Proficient with:
 - Design software such as AutoCAD/AutoCAD Civil
 - MS Office software

BENEFITS

Gomez and Sullivan offers a competitive benefits package including medical insurance (cost shared) for all regular full-time employees and their families, long-term disability, education assistance programs, plus a 401K and profit sharing. We are a business with a firm belief in treating our team members as well as we treat our clients, and we maintain a personable, positive work environment.

COMPANY PROFILE

Gomez and Sullivan has been providing specialized engineering, environmental science, and data management solutions to the water resource and energy sectors since 1993. Our staff of approximately 50 individuals based in New York (Utica, Williamsville, Albany) and New Hampshire (Henniker) includes water resource, civil, structural, geotechnical, mechanical, electrical, and environmental engineers, as well as environmental scientists, regulatory specialists, ecologists, fisheries biologists, hydrogeologists, geologists, geomorphologists, and GIS specialists. Our core services include dam safety, engineering, hydropower licensing, environmental studies, hydrology and hydraulics, fisheries & fish passage, stream & habitat restoration, and information management and geographic information systems. We are an Equal Opportunity Employer.

If you qualify and are interested in joining our team, please submit your resume and cover letter to:
